

# Test of FAITH

Science and Christianity

## An Introductory Course for Homeschoolers

- ARE SCIENCE AND CHRISTIANITY IN CONFLICT?
- HAS THE BIG BANG PUSHED GOD OUT OF THE UNIVERSE?
- IS EVOLUTION COMPATIBLE WITH FAITH?
- IS CLONING ETHICAL?
- ARE HUMANS NO MORE THAN BIOLOGICAL MACHINES?

This **FREE** 3-8 week course for homeschooled students **aged 13-18** unpacks a range of hot topics. The course is designed for use with the award-winning documentary *Test of FAITH* (available online for \$14.40).

- Ready-to-use lessons
- Study notes, key vocabulary, follow-up questions, and essay topics
- No lesson preparation required
- Emphasizes personal engagement and reflection
- General introduction to the philosophy of science and religion
- Opportunity for more in-depth exploration of current issues
- Accessible to high school students and advanced junior high students

### **Praise for *Test of FAITH*:**

“With terrific production values, impeccably qualified experts, and a clear-eyed focus on the most important questions, this is an invaluable resource for thinking about science and faith.”

- **Andy Crouch, Senior Editor, Christianity Today International**

### **Praise for the homeschool course:**

“Very useful and absolutely worthwhile.” - **Parent**

“Not only focuses students’ attention on the important science-faith questions raised by the film, but provides parents and other educators with a flexible framework that can be adapted for a range of grade-levels and schedules. This curriculum could be used at home or in co-op and academy settings, helping young people get the big picture of why Christians need to study, understand, and be engaged in science. An important and timely resource for homeschoolers.” - **Dr. Mark Sprinkle, Senior Fellow of Arts and Humanities & Senior Web Editor, BioLogos, and homeschooler**
